The Painted Metal Atelier

# **A-BLACK**

The application of our many years of know-how in the world of pre-painted metals allows us to best satisfy the creative needs of **architecture** and **design** projects.

**A-Black** is our **Premium Collection** product that gives metal a "**wrinkled**" effect.

Elegant and evocative, the wrinkled effect is used in the design world to create engaging, welcoming settings, in which the material texture is often combined and enhanced with low lighting to create an emotional atmosphere.

As a result of its good mechanical properties, like **scratch resistance**, **A-Black** is also used for the production of roofing panels.

The special **A-Black** pre-painting treatment gives products a wrinkled, creased, substantial looking finish that is durable over time.

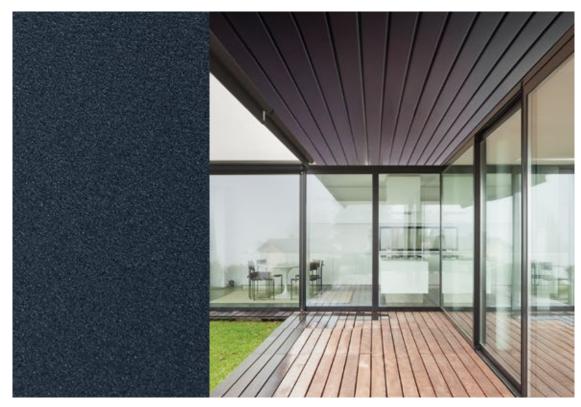

# **A-BLACK**

**A-Black** is a product in constant development and evolution, the out come of a long process of **research** and **development**, that has resulted in the realization of products of outstanding **aesthetic** effect, using **HD polyester resin** based paints.

**A-Black** with its "creased, wrinkled" surface morphology stands out for its "fake tile" appearance. It is a vibrational surface that can have different, controllable **frequencies** and **depths**.

This product is mainly characterized by a **gloss** level lower than 5.

Find out about our applications

#### **TREATMENT**

2 degreasings + chrome-free passivation

# PAINTING SPECIFICATIONS COLOUR TOP: Anthracite grey PE-HD WRINKLED COLOUR BACK: Anthracite grey

UV Radiation Resistance Category: RUV3 Coating used: compliant with RoHS Directive

PE  $(10 \pm 2 \text{ microns})$
