The Painted Metal Atelier

A-TITANIUM

The application of our many years of know-how in the world of pre-painted metals allows us to best satisfy the creative needs of **architecture** and **design** projects.

A-Titanium is our **Premium Collection** product inspired by **titanium zinc**.

Titanium is characterized by its extremely high **strength** and it is an important element in **modern architecture**.

The Guggenheim Museum in Bilbao, also known for its very unusual shape as the "**titanium flower**", is the project that earned the starchitect Frank Gehry the appreciation of the wider public, thanks to the daring shapes and the splendour of the **titanium** facing.

With **A-Titanium** our **pre-painted metal Atelier** can offer a **titanium zinc** finish, to best satisfy every design requirement.

A-TITANIUM

A-Titanium is the result of a production process involving application of **paint** on aluminium to create a finish resembling **titanium zinc**.

The product is recommended for **outdoor** use (**tinsmithing, cladding, etc.**). Since the pattern includes multiple colours, it is not possible to give a Delta E value, although different runs can certainly be used together.

A more rugged appearance can be achieved by applying a transparent **wrinkled** finish.
